

Table 17. Least square means for lint yield grown with two irrigation treatments (wet vs. dry) in the 2015 RBTN conducted at Maricopa, AZ. Cultivars were grown in a 0,1 alpha lattice design with three replicates per treatment planted (May 11, 2015). The dry treatment started at first flower (July 11, 2015) and continued to the last day of irrigation (Sept. 20, 2015). The data was analyzed in SAS v9.4 using a mixed model (Cooperator: Alison Thompson)

Cultivar	Mean lbs/a	Irrigation Treatment		Treatment Difference lbs/a	Treatment Difference <i>P-value</i> <sup>†</sup>
		Wet*	Dry*
